

Urogenx® Bovine Pericardial Tissue Patch

Urology Indications

- Cervical anastomotic leakage
- Corporoplasty
- Partial nephrectomy
- Pelvic Organ Prolapse Repair
- Peyronie's repair
- Rectovaginal fistula
- Urethroplasty
- Vesicovaginal Fistula Repair

- Artificial Urinary Diversion
- Artificial Urinary Sphincter (AUS) Placement
- Bladder Augmentation
- Hypospadias Repair
- Pubovaginal Sling Surgery
- Ureteral Reconstruction
- Urethral stricture Repair
- Urologic Venous Reconstruction

elixP™ fixated patches excel in the 4 major categories

Ultimate Tensile Strength

Suture Retention

Burst Strength

Elasticity & Elongation

Wide Variety of Sizes with Uniformity

Model	XM-04	XM-05*	XM-06	XM-07*	XM-08*	XM-09	XM-10*
Size (cm)	0.6 x 8	0.8 x 8	1 x 6	1 x 10	1 x 14	1.5 x 8	1.5 x 10
Model	XM-11	XM-12	XM-13	XM-14	XM-15	XM-16	XM-17
Size (cm)	1.5 x 16	2 x 9	2.5 x 15	4 x 4	4 x 6	4 x 16	5 x 6
Model	XM-18	XM-19	XM-20	XM-21	XM-22	XM-23

Salient Features

- ✔ 3-year shelf-life
- ✔ Plethora of applications
- ✔ Highly biocompatible
- ✔ Intact Matrix Membrane
- ✔ Minimal rinsing time
- ✔ Conforms to vasculature
- ✔ Easy to handle
- ✔ Cost-effective
- ✔ Uniform thickness
- ✔ Exceptional tensile strength
- ✔ Resists delamination
- ✔ Extremely elastic & Pliable
- ✔ Superior suture retention

elixP™ Tissue Technology

Next Generation Technology

Our bovine pericardial tissue patch, Invengen®, is fixed with our proprietary elixP™ Fixation Technology. This preserves the triple helical structure of the individual collagen molecules (intramolecular) and between collagen fibrils (intermolecular). This fixation process achieves complete reduction of antigenicity and preserves the natural collagen formation of the tissue.

Meets Surgeon's Needs

This treatment leads to 100% crosslinking of the tissue to prevent unwanted effects such as suture line bleeding, delamination, and inflammatory response.

Prevents and Protects

This fixation process achieves complete reduction of antigenicity and preserves the natural collagen formation of the tissue.

Designed for Durability

After fixation, our patches integrate seamlessly by supporting cell and tissue in-growth and maintains structural integrity and viability for longer than ever before possible.

elixP™ Fixated Tissue

Improved Healing

This advanced treatment leads to superior biocompatibility with the host tissue and prevents degradation to allow for a bovine pericardial tissue patch that can be trusted for a plethora of surgical applications.
